NVL BIO

- LIFTING POWER -

MADE IN KOREA

This product is "Medical Device" (E.O gas sterilized product)

NVL - BIO *lifting* THREAD

"Quality has been proven 50 countries"

CE2195  ISO13485

Clean room facility

Tensile strength measurement

Moisture measuring system

Cog machine

Special cog machine

Sterilizer

NVL - BIO *lifting* THREAD

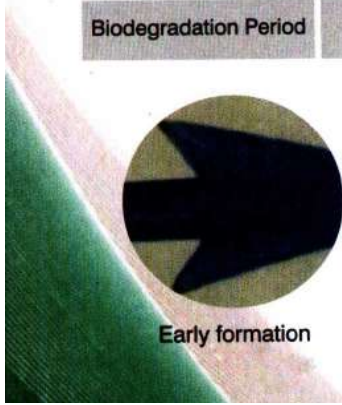

NVL-Bio lifting threads are made of PDO, PCL which are bio-degradable materials. This and promote skin regeneration.

NVL-Bio Lifting threads have various types and sizes for different applications.

[Mono/ Twin/ Screw/ Double Screw/ Hydra/ Coil spring/ Braid/ Cog/ Double Cog/ Nose/ Eye/ Body/ Pro]

Especially our Double cog threads are designed by patented technology for face-lifting applications. Unlike other threads whose surfaces are cut or knotted or just mold to create cogs, the cogs of NVL_Bio Double Cog threads are created by mold-cutting techniques without heating the threads. This technology minimizes the damage to the surfaces of the threads and makes the threads solid therefore, its tensile and anchoring strengths are superior to other thread products by patented unique technology.

TYPE	PDO	PCL	PLCL
Biodegradation Period	6-7 months	36 months	18-23 months

Early formation

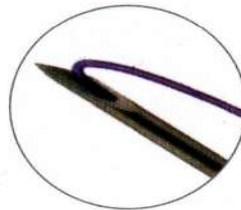

After 30 days

After 90 days
